

Industry assistance

Polemic Forensic has prepared submissions for adjustment assistance for the NSW fishing industry.

These submissions have been for both individual fishermen and the relevant cooperatives which receive their catch.

Individual fishermen received compensation predicated upon average fishing income to which a specified multiplier was applied. Generally re training packages are also offered.

No compensation was offered pertaining to the actual quota entitlements actually held by the fishermen.

Assistance to the fishing cooperatives have been assessed by reference to the diminution in their financial position attributable to the loss of fishing members whom contributed stock in trade and sales revenue (from sales of fuel and ice).

The cooperatives are also generally offered additional financial assistance with regards to improving their operations and the like.

How can Polemic Forensic assist with regards to industry assistance schemes?

Polemic Forensic can prepare submissions and negotiate compensation on behalf of affected individuals/entities.
